## Elementals NanoFusion Pro Pen

The **Elementals NanoFusion Pro Pen** is a unique handheld, skin treatment modality used by dermal professionals + aestheticians to improve penetration, skin massage capabilities + efficacy of targeted solutions.

### How does the NanoFusion Pro Pen work?

Combined with the proprietary massage + vibration properties, **NanoFusion Pro Pen** amplifies skin rejuvenation by inducing fibroblast stimulation collagen synthesis, skin healing, glycation of fine lines + wrinkles, melasma, balancing acne + acne scarring.

### The NanoFusion Pro Pen Unique Point of Difference

The innovative technology behind the **NanoFusion Pro Pen** are its 81 patented, microscopic silicone pyramids made from pharmaceutical-grade, mono-crystalline silicon which create a short-term opening of the stratum corneum.

The **NanoFusion Pro Pen** achieves remarkable results by opening nanoscale channels in the skin for around 15 minutes, increasing the penetration + absorption rate of ingredients, as well as delivering them to the right location within the skin - thus maximising + optimising their efficacies.

Equivalent to a 0.25 needling depth to elevate all skin concerns, there is no bleeding + no risk of infection, thus making the **NanoFusion Pro Pen** a much safer + more enjoyable treatment.

The NanoFusion Pro Pen achieves remarkable results for the treatment of glycation, fine lines + wrinkles, melasma, balancing acne + acne scarring.

**NANOFUSION PRO PEN = INNOVATIVE INFUSION TECHNOLOGY**
